Customer acknowledges that additional factors, including system capacity, customer demand, system maintenance requirements, and availability of supply may result in peak delivery rates less than 160 gpm. Customer may, from time to time, increase the number or size of metering for additional deliveries up to a maximum peak flow rate of 160 GPM, subject to payment of any fees due for meter installation, expansion or replacement pursuant to Zone 7's connection fee ordinance.

3. Alternative Water Supply. Customer will not purchase or lease water for use in Exhibit A from any third party without the prior written approval of Zone 7. Notwithstanding the forgoing, Customer may receive emergency deliveries from other sources for firefighting and other emergency purposes.
